Accessing Our Website: Troubleshooting Guide for Schools & Districts

Sometimes school or district networks automatically block new websites. This can happen for a few reasons:

Common Reasons for Blocking

- New Domain – New sites may not yet be categorized in the school's filtering system.
- Incorrect Category – The site may have been mistakenly placed in a blocked category (e.g., "social media," "games," or "unknown").
- Default Security Settings – Many schools automatically block uncategorized or unverified domains until reviewed.

Steps to Resolve

1. Contact IT/Network Administrator – Share the website URL with your school or district's IT help desk. Let them know the site is safe and intended for educational/professional use.
2. Ask for a Review/Recategorization – Request that the site be recategorized appropriately (e.g., "Education," "Professional Development," "Non-Profit") or added to the allow list.
3. Provide Supporting Info – Be ready to share:
 - Website URL: <https://www.joincalie.org>
 - Purpose: Professional development and resources for educators
 - Organization: California Association for Leading Innovation in Education

Typical Resolution

Once IT reviews and adjusts their filter, access is usually restored within a short time.
